

## Outlook

## 30 November 2022

The Nifty previous session ended 0.75% up at 18758.35. It opened on a flat note and moved up towards making fresh all-time high and ended in green. Making a new high when most of the Index majors making double top is worrisome. Hence, staying cautious is advised. Chart pattern suggesting range bound oscillation in the price band of 18550-18920 is likely. Bullish candle on daily suggesting intraday retracement may again find buyers on dips around critical supports.

On the Nifty hourly chart, massive negative divergence in RSI suggesting the benchmark index may remain stuck in the price band of 18550-18920. Staying cautious on rise is advised.

Nifty patterns on multiple periods suggesting; it ended in green. However, staying cautious on rise is advised. Broader chart pattern suggesting, the Nifty looks extremely overstretched and may see selling on rise.

Nifty Crucial Supports & Resistances-Supports- 18550, 18400 Resistances- 18880, 18920
